Roll : 24102C0086

Subject : E-Waste

E-Waste Comparison Overview

	Country	Annual Generation	Formal Recycling rate	Key Operational characteristic
1]	Germany	~ 1.6 million tonnes	~ 52 - ~ 56 percent	High formal recovery ; strict Extended Producer Responsibility.
2]	United Kingdom	~ 1.6 million tonnes	~ 57%	Strong civic collection infrastructure & high-per capita recycling efficiency.
3]	Brazil India	~ 3.2 million tonnes	~ 1 to ~ 5 percent	Rapid annual growth (~ 10.4%) ; 90% processed via informal sectors.
4]	India Brazil	~ 2.1 million tonnes	~ 1 to 3 percent	Heavy reliance on informal collectors ; weak enforcement despite national solid waste policies.
5]	United States	~ 6.9 million tonnes	~ 15 to 35 percent	Massive Consumption
6]	China	~ 10.1 million tonnes	~ 16 to 20 percent	World's largest generator

India's Key initiatives while tackling E-waste :

- 1] E-Waste Management Rules (2022) : Set strict EPR targets up to 80% for producers & add items like solar panels & batteries.
- 2] Central CPCB Portal : digitizes EPR tracking and enables trading of recycling credits.
- 3] Formalization : Regulates dismantlers to phase out hazardous open burning.
